

KINOMAP TRAINER

Record, use and share your training videos !

Turn your bike and home trainer into a powerful and fun fitness device. Just choose among the geolocated videos of Kinomap and train ! Watch your icon moving on the map and on the elevation line : your goal is to follow the rhythm of the original video.

▶ Train with your friends

A multiplayer mode is also available using the Game Center : 4 players can train on the same video, update leaderboards according to time and distance, achieve goals and discuss together with the vocal chat feature.

▶ Compatibility ANT+ and Bluetooth

This app is ANT+ and Bluetooth compatible. Your iPad or iPhone can receive the cadence, speed, power or heart rate data from compatible devices.

▶ Contribute yourself

- You can contribute to add your own videos, shot either:
- with the free application Kinomap Maker
 - with a GPS camera
 - with your usual camera and a GPS logger

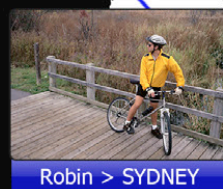

Available on the
App Store

Tour the world

Features

Sensors

Use ANT+ or Bluetooth Smart sensors to get your cadence, power, speed, distance, heart rate data.

Simple interface

No clutter: launch the app, pick a video and start training. That's it.

Quality videos

Using Kinomap's growing database and get access to dozens of HD wide-angle, GPS-located videos shared by the community of users.

Universal

The app works on all iOS devices: iPad, iPad Mini, iPhone 4, iPhone 4S, iPhone 5, last generation of iPod Touch.

Share

Happy with your training? Share it by email, Facebook, Training Peaks, RunKeeper & more.

Voice chat

Missing the Sunday morning ride with your friends? Join them and have a real voice chat while training. Peter is boring? Mute him.

Multiplayer

Up to 4 players can train on the same video. Invite your friends or let Apple Game Center find mates for you.

Mirroring

Using Airplay on an Apple TV or an HDMI adapter, use your TV as an external display to get the most out of your iPhone or iPad.

Dashboard

The dashboard displays your speed, cadence, power, instant slope, total length reached and heart rate for both you and the person filming the original video.
